# Sustainable. For the benefit of the environment.

Paper packaging is the go-to eco-friendly solution. We've gone one step further in our commitment to sustainability.

Sustainability should be more than just a buzzword. We take an honest approach to this sensitive topic. Corrugated cardboard and cardboard are natural materials and can be easily and 100% recycled. Our **ColomPac®** products are of course FSC® certified and are produced regionally in Austria. We act responsibly by constantly optimising our

products, considering the optimised use of materials and, where possible, minimising greenhouse emissions in the value chain. But our claim goes further: more ideas instead of more material, well thought-out instead of simply copied - this is how we make **ColomPac®** an ever-better product.

FSC® is the abbreviation for Forest Stewardship Council®, an international organisation that promotes socially and environmentally responsible forestry. The FSC® logo shows that we have been certified by independent auditors and that the prescribed standards are met in all our production stages. This is checked annually. You can find the certificate on the **ColomPac®** website under Downloads.

**ColomPac®** packaging is 100% recyclable and can be recycled up to 20 times without any loss of quality thanks to the material qualities used. To ensure that this valuable raw material can be easily returned to the recycling cycle, the products are labelled with the recycling codes PAP 20 (corrugated cardboard) and PAP 21 (solid board).

**ColomPac® products are FSC® certified and 100% recyclable**

**From raw materials to our customers - responsible use of all resources.**

The further reduction of our CO<sub>2</sub> emissions across the entire value chain is our goal:

- Optimised use of materials
- Reduction of own energy consumption through state-of-the-art systems and regular monitoring
- Use of renewable energies - more than 11,000 m<sup>2</sup> of photovoltaic systems and the use of green electricity
- Heat recovery and groundwater cooling
- Sophisticated logistics by reducing empty runs and optimising pallet utilisation.

In addition, we are making a voluntary offsetting contribution for our **ColomPac®** products in 2024 by investing in climate protection projects.

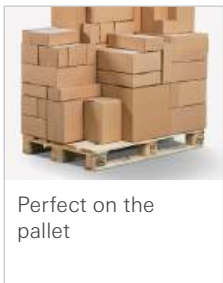

# CP 154

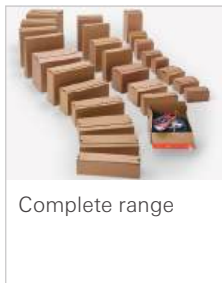

The perfect fit.  
ColomPac® Euroboxes designed for pallets.

## The best thing since the invention of the pallet.

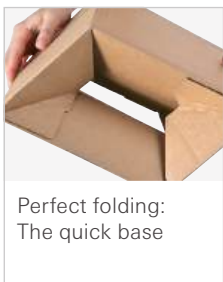

Different sizes, multiple possibilities. Featuring fast to assemble bases for efficient packaging, Euroboxes are designed to stack and conform to Euro pallet dimensions without overlapping. This saves space in the cargo compartment, the warehouse and lowers costs.

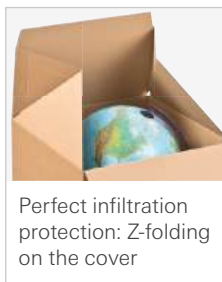

Perfect on the pallet

Complete range

Perfect folding:  
The quick base

Perfect infiltration protection: Z-folding on the cover

# More than just packaging. Showcase your brand!

Offset, flexo or both?  
Interior and exterior? Everything is possible.

## Your print data - Our service!

We will help you create the print data.

# Individually

customised and designed

## Design by ColomPac<sup>®</sup>.

The packaging is the marketing tool that reaches the customer 100%. The right design, whether printed on the outside, inside or on both sides, unpacking becomes an experience and your product and your message get across.

We are happy to take care of the graphic design and professional realisation. Starting with the first graphic mock-up to the finished product. Everything from a single source.

## Individual designs.

If something is particularly large, long, heavy or just needs to stand out, we leave it up to our developers. This is how a "tailor-made suit" for your product is developed.

A virtual mock-up quickly gives you an initial three-dimensional impression of your customised packaging.

# Printing methods

that catch the eye and convince

## Flexo printing.

Printed directly onto the corrugated cardboard in up to 2 colours, flexographic printing is ideal for logos, lettering and markings. From just 5.000 units you will receive your branded packaging.

## Offset printing.

Can do even more. Photorealistic images with up to 6 colours, matt/gloss effects and additional finishes make your packaging into something special. Offset printing is also worthwhile for frequent change of sujet.

## cycleprint.

Makes sustainability visible.

A natural surface, printed on a material with up to 98% recycled content. This makes sustainability not only visible, but also tangible and perceptible.

You can find more inspiration of individual packaging at [www.colompac.com](http://www.colompac.com).

**You want your customised packaging to reach your customers even better?**

# The DHL small parcel is coming –

## We already have the suitable assortment!

From January 1, 2025, Deutsche Post's merchandise mail will become the new "DHL small parcel". ColomPac® already has the solutions with the right dimensions.

What's new? According to DHL, the maximum height will be increased from 50 to 80 mm. With the new DHL small parcel shipping method, shipments of up to 353 x 250 x 80 mm and 1,000 g in weight can be sent. The DHL small parcel offer is only available to business customers. More information: [dhl.de/kleinpaket](http://dhl.de/kleinpaket)

### CP 010.84

- Adapted to DHL small parcel dimensions with a variable filling height of up to 72 mm
- Flexible without filling material
- Robust protection from high quality corrugated cardboard
- Effective size decreases with increasing content thickness

### CP 021.09

- Adapted to DHL small parcel dimensions with a variable filling height of up to 73 mm
- Sturdy, glued corner and edge protection
- Easy to fill thanks to stand-up function
